Project Design Phase-II
Data Flow Diagram & User Stories

Date	23-10-2026
Team ID	SWUID2026403578
Project Name	iMovies
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) illustrates how data moves within the iMovies platform. It captures how users interact with the system, how movie information flows between processes, and where information is stored.

Example: DFD Level 0 (Industry Standard)

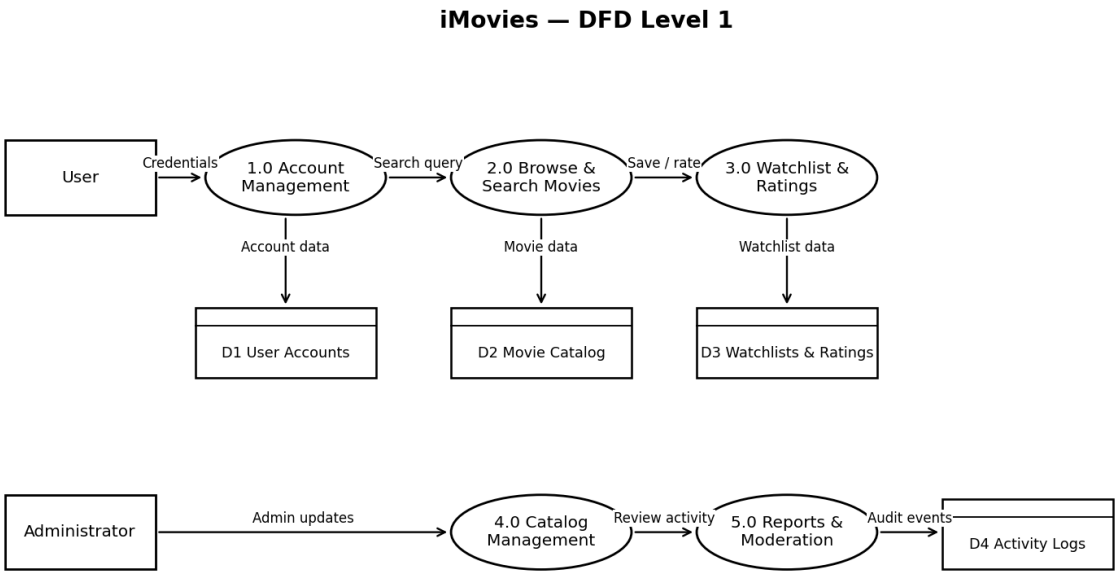

User Stories

User Story Table – iMovies

User Type	Functional Requirement (Epic)	User Story / Task	Acceptance Criteria	Priority	Release
User	Account Management	As a user, I can sign in or create an account to access iMovies.	User can sign in or register successfully.	High	Sprint-1
User	Movie Browsing	As a user, I can browse and search available movies.	Relevant movie results are displayed.	High	Sprint-1
User	Movie Details	As a user, I can view details about a selected movie.	Selected movie details are shown correctly.	Medium	Sprint-2
User	Watchlist	As a user, I can add or remove movies from my watchlist.	Watchlist changes are saved and displayed.	High	Sprint-1
User	Ratings & Reviews	As a user, I can rate or review a movie.	Rating or review appears with the movie.	Medium	Sprint-2
Admin	Catalog Management	As an admin, I can add, update, or remove movie information.	Catalog changes are saved successfully.	High	Sprint-1

DFD Level 1 (Main Processes and Data Stores)

Note: The iMovies features in this document are assumed from a typical movie-discovery application. Please adjust them if the actual project requirements differ.
