Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	23-10-2026
Team ID	SWUID2026403578
Project Name	iMovies
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

Functional Requirements – iMovies App

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	**User Authentication & Profile**	Sign up, Login, Password Reset
		OAuth login using Google / Apple
		Select favorite genres and languages at signup
		Manage profile, dark mode, and kids / family profiles
FR-2	**Movie Discovery & Recommendations**	Browse and search movies by title, actor, director, genre, and language
		Mood-based movie recommendations and "Surprise me" pick
		Regional language filters with subtitle and dub options
		View movie details, trailers, cast, and ratings
FR-3	**Ticket Booking & Pricing**	View showtimes and theatres near the user
		Select seats with a 10-minute seat hold
		Show the full ticket price upfront with no hidden fees
		Group booking with split payment
		E-ticket, cancellation, and refund
FR-4	**Payments**	Secure payment using UPI, card, or wallet
		Automatic refund on failed payments
FR-5	**Streaming & Watchlist**	Stream movies with adaptive video quality
		Create a watchlist and get release reminders
		Share watchlist and movie plans with friends
FR-6	**Reviews & Ratings**	Post and read verified, spoiler-free reviews
		Combined critic and user rating on every movie

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

NFR No.	Non-Functional Requirement	Description
NFR-1	**Usability**	The app should offer a clean, intuitive UI that lets users find and book a movie in a few taps, with regional language support.
NFR-2	**Security**	All data transfers must be encrypted. Payments must be PCI-DSS compliant, with role-based access and token-based authentication.
NFR-3	**Reliability**	Ensure booking, payment, and streaming work reliably, with automatic refunds and no double bookings of a seat.
NFR-4	**Performance**	Pages should load within 2 seconds. Seat selection and booking actions should be near-instant, and streaming should start with minimal buffering.
NFR-5	**Availability**	The system should maintain 99.9% uptime, especially during peak hours and new-release weekends.
NFR-6	**Scalability**	Should support high concurrency during blockbuster releases and rapid feature scaling through microservices.
